

Security data sheet

This document contain important health & security information

1.- Product ID

polyester polymer , for textile applications (continuous filament & short fiber)

2.-composition (ingredient information)

Polyethylene terephthalate

CAS Number 25038-59-9

Chemical formula

HO-(CH₂)₂-OOC-11-(CH₂)₂-OH

Appearance: small cylindrical granules

Smell: no smell

Specific Gravity & density: Aprox 1.35 to 1.40

Fusion point. Max 260 °C - Max 500 °F

Auto ignition temp. 450 °C – 842 °F

Solubility in Water : none

3.- Stability & Reactivity

It's stable under normal conditions

4.- toxicological information

Not classified as dangerous.

5.- Ecological information.

Biodegradability: not biodegradable

6.- Relative disposal considerations .

Recyclability , it's recyclable.

7.-transportation precautions

Not classified as dangerous.

8.- rules & regulations

This resins are fully approved on textile applications (continuous filament & short fiber)

Atentamente:

Jesús Almazán Castro
Gerente de Producción.
